Results-driven software quality assurance professional with experience in testing and ensuring the delivery of high-quality software products. Skilled in identifying and resolving defects, implementing testing processes, and collaborating with cross-functional teams to achieve project goals. Proven track record of improving product reliability and customer satisfaction through extensive testing and quality assurance methodologies. Strong problem-solving and analytical skills, with a focus on attention to detail. Proficient in industry-standard testing tools and software development best practices.

## Experience

**Nov 2022- Present**
Cloud Mesh Solutions · Full-time

**Software Quality Assurance Engineer**

This company hired me for the role of Software Quality Assurance. In this job, my part is to maintain the quality of products. The company products are an eCommerce website and Mobile Application. I applied various methodologies of testing Like manual and Automation Testing and wrote documentation of the products like concise test scenarios, concise test cases, and use cases. Along with this I also made the requirement document for the products.

April, 2022 - Sep, 2022
QuellxCode Pvt Ltd · Full-time Islamabad

**Software Quality Assurance Engineer**

This company hired me for the role of Software Quality Assurance. In this job, my part was to maintain the quality of products. Actually, I was testing the mobile Application and web Application of the company. I use various testing techniques like unit testing, integration testing, system testing, smoke testing, performance testing, and API testing. By applying these techniques I made the software bugs-free.
